**HUBUNGAN PERILAKU *VERBAL ABUSE* ORANGTUA TERHADAP TINGKAT
KEPERCAYAAN DIRI ANAK SEKOLAH DI SD N CANDIREJO 2**

(xiv + 61 halaman + 6 tabel + 2 gambar + lampiran)

ABSTRAK

Latar belakang : Banyak orang tua yang melakukan *verbal abuse* dengan tidak sengaja saat mendidik anak. *Verbal abuse* dapat berdampak pada psikologis seperti kurangnya kepercayaan diri anak.

Tujuan : mengetahui hubungan perilaku *verbal abuse* orangtua terhadap tingkat kepercayaan diri anak sekolah di SD N Candirejo 2.

Metode: *deskriptif korelasi* dengan pendekatan *cross sectional*. Populasi penelitian ini adalah 160 siswa dengan jumlah sampel 62 responden menggunakan metode *proportional random sampling*. Instrumen yang digunakan adalah kuesioner kepercayaan diri dan K-VAQ (*verbal questionnaire versi korea*). Data Analisis menggunakan uji *kendall tau*.

Hasil: menunjukkan perilaku verbal abuse hampir sebanding pada kategori minimal sebanyak 22 siswa (35,5%) dan anak memiliki tingkat kepercayaan diri paling banyak pada kategori tinggi sebanyak 23 siswa (37,1%). Hasil uji statistik mendapatkan nilai *p value* $0,000 < 0,05$ yang berarti terdapat hubungan perilaku *verbal abuse* orangtua terhadap tingkat kepercayaan diri anak sekolah di SD N Candirejo 2 dengan korelasi *kendall tau* pada kategori lemah.

Kesimpulan : ada hubungan perilaku *verbal abuse* orangtua terhadap tingkat kepercayaan diri anak sekolah di SD N Candirejo 2.

Saran : diharapkan orangtua tidak melakukan kekerasan verbal kepada anak sebagai sarana mendisiplinkan anak, orangtua dapat menggunakan komunikasi yang baik, seperti memberikan pujian dan contoh yang nyata.

Kata kunci : kepercayaan diri, *verbal abuse*, anak usia sekolah

**THE CORRELATION BETWEEN VERBAL ABUSE BEHAVIOR OF PARENTS AND
THE CONFIDENCE LEVEL OF STUDENTS AT SD N CANDIREJO 2**

(xiv+ 61pages + 6tables + 2 pictures + attachments)

ABSTRACT

Background : Many parents abuse verbal abuse while educating children. Verbal abuse can have psychological effects such as lack of self-confidence of children.

Purpose : to know the correlation between verbal abuse behavior of parents and the level of confidence of students at SD N Candirejo 2.

Methods : descriptive correlation with a cross sectional approach. The population of this study were 160 students with total sample of 62 respondents used the *proportional random sampling* method. The instrument used confidence and K-VAQ questionnaire. The data analysis Bivariant used *kendall tau* test.

Results: showed almost half verbal absue behavior in the minimum category of 22 students (35.5%) and children had the highest level of confidence in the high category of 23 students (37.1%). The statistical test results obtained a p value of 0,000 <0.05 which means there is a relationship between verbal abuse behavior of parents to the level of confidence of school children in SD N Candirejo 2 with a correlation of kendall or in the weak category.

Conclusion: there is a relationship between verbal abuse parents' behavior on the level of confidence of school children in SD N Candirejo 2.

Suggestion: parents are expected not to do verbal abuse to children as a means of disciplining children, parents can use good communication, such as giving praise and real examples.

Keyword : confidence, verbal abuse, school-age children
