**KERASIONALAN RESEP OBAT ANTIPSIKOTIK SKIZOFRENIA
PASIEN RAWAT JALAN DI RSU KHARISMA PARAMEDIKA WATES
JANUARI-DESEMBER 2020**

ABSTRAK

Latar belakang : Skizofrenia merupakan gangguan jiwa kronis dan berat, ditandai dengan distorsi dalam berpikir, persepsi, emosi, bahasa, rasa diri dan perilaku.

Tujuan : Penelitian bertujuan mengevaluasi kerasionalan peresepan obat antipsikotika pasien skizofrenia rawat jalan di RSU Kharisma Paramedika Wates tahun 2020.

Metode : Penelitian observasional disajikan secara deskriptif dengan pendekatan retrospektif menggunakan data rekam medik. Sebanyak 52 sampel yang dipilih secara *purposive* . Data dianalisis dengan *microsoft excel* dan disajikan dalam bentuk tabel persentase.

Hasil : Jumlah pasien skizofrenia 61,5% pasien pria dan 38,5% pasien wanita, dengan usia pasien 18-28 tahun sebanyak 17,3% ; 29-38 tahun sebanyak 25% dan 39-48 tahun sebanyak 57,7%. Tipe skizofrenia tidak terinci sebanyak 63,5% ; tipe paranoid 26,9%; tipe residual 5,8% ; tipe tidak tergolongkan (1,9 %) dan tipe lainnya (1,9 %). Pola terapi kombinasi (65,4%) ; kombinasi atipikal+atipikal (risperidon dan klozapin) sebanyak 28,8% ; kombinasi tipikal+atipikal (haloperidol dan klozapin) sebanyak 19,2% dan kombinasi atipikal+tipikal+atipikal (risperidon+haloperidol+klozapin) sebanyak 9,6%. Terapi tunggal (34,6%) berupa terapi atipikal (risperidon,17,3%) dan tipikal (haloperidol, 11,5%).

Kesimpulan : Evaluasi peresepan antipsikotika diperoleh tepat indikasi (100%), tepat pasien (98,1%), tepat obat (78,8%), tepat dosis (82,7%), tepat frekuensi (80,8%) dan tepat cara pemberian (100%).
