GAMBARAN PENGETAHUAN WANITA USIA SUBUR TENTANG ALAT KONTRASEPSI DALAM RAHIM (AKDR) DI PMB NITA DESA CIPANCAR KECAMATAN SERANGPANAJANG KABUPATEN SUBANG

(xiii + 83 halaman + 12 tabel + 2 bagan + 9 lampiran)

ABSTRAK

Latar Belakang : Membangun keluarga sejahtera merupakan tujuan utama program KB. Gerakan KB nasional salah satunya yaitu kegiatan KB dalam meningkatkan penggunaan Metode Kontrasepsi Jangka Panjang (MKJP). Namun, dalam kondisi lapangan masih kurangnya pengguna MKJP, kebanyakan dari mereka menggunakan Metode Jangka Pendek yaitu KB suntik dan pil. Di wilayah PMB Nita melalui wawancara langsung mengenai AKDR pada 5 wanita usia subur didapatkan bahwa 1 responden (usia 20-35 tahun, pendidikan SMP, pekerjaan wiraswasta) mengetahui efek samping, 1 responden (usia <20 tahun, pendidikan SMP, pekerjaan IRT) mengetahui cara pemasangan, 2 responden (usia 20-35 tahun dan >35 tahun, pendidikan SMP, pekerjaan IRT) mengetahui keuntungan, 1 repondedn (usia 20-35 tahun, pendidikan SMA, pekerjaan wiraswasta) mengetahui keuntungan dan cara pemasangan. Sehingga tujuan dalam penelitian ini untuk mengetahui Gambaran Pengetahuan Wanita Usia Subur Tentang Alat Kontrasepsi Dalam Rahim (AKDR) Di PMB Nita Desa Cipancar Kecamatan Serangpanjang Kabupaten Subang.

Metode : Desain penelitian ini menggunakan penelitian kuantitatif, desain deskriptif dan rancangan penelitian *Cross Sectional*. Jumlah populasi 103 wanita usia subur dengan cara *Quota Sampling* sehingga didapatkan jumlah sampel 82 wanita usia subur. Instrumen penelitian kuesioner dan analisis data yang digunakan *Analisis Univariat*.

Hasil : Hasil penelitian menunjukkan bahwa tingkat pengetahuan wanita usia subur tentang Alat Kontrasepsi Dalam Rahim (AKDR), sebagian besar responden memiliki pengetahuan kurang tentang Alat Kontrasepsi Dalam Rahim (AKDR) 34 (41%) dan hanya 18 (22%) yang memiliki pengetahuan baik tentang Alat Kontrasepsi Dalam Rahim (AKDR).

Kesimpulan : Gambaran pengetahuan wanita usia subur tentang Alat Kontrasepsi Dalam Rahim (AKDR) di wilayah PMB Nita Desa Cipancar Kecamatan Serangpanjang Kabupaten Subang, sebagian besar responden memiliki pengetahuan kurang tentang AKDR sebanyak 34 (41%).

Kata Kunci : Pengetahuan, Wanita Usia Subur, Alat Kontrasepsi Dalam Rahim (AKDR)

DESCRIPTION OF FERTILE AGE WOMEN'S KNOWLEDGE ABOUT CONTRACEPTIVES IN THE WOMB (AKDR) IN PMB NITA CIPANCAR VILLAGE SERANGPANJANG DISTRICT SUBANG REGENCY

(xiii + 83 page + 12 tables + 2 charts + 9 attachments)

ABSTRACT

Background : Building a prosperous family is the main goal of the KB program. The national birth control movement is one of the kb activities in increasing the use of Long-Term Contraceptive Methods (MKJP). However, in the field conditions there is still a lack of MKJP users, most of them use the Short Term Method of injectable birth control and pills. In pmb Nita area through direct interviews on 5 women of childbearing age, it was obtained that 1 respondent (age 20-35 years, junior high school education, self-employed work) know the side effects, 1 respondent (age <20 years, junior high school education, IRT work) know how to install, 2 respondents (ages 20-35 years and >35 years, junior high school education, IRT work) know the benefits, 1 repondedn (age 20-35 years, high school education, self-employed work) know the benefits and how to install.

Objective : Know a description of the Knowledge of Women of Childbearing Age About Contraceptives In the Womb (AKDR) In PMB Nita Cipancar Village Serangpanjang District Subang Regency.

Method : The design of this research uses quantitative research, deskriptif design and cross *sectional* research design. The population of 103 women of childbearing age by *Quota Sampling* resulted in a sample of 82 women of childbearing age. Questionnaire research instruments and data analysis used *Univariate Analysis*.

Results : The results showed that the level of knowledge of women of childbearing age about Contraceptives In the Womb (AKDR), most respondents had less knowledge about Contraceptives In the Womb (AKDR) 34 (41%) and only 18 (22%) who have good knowledge about Contraceptives In The Womb (AKDR).

Conclusion: Overview of knowledge of women of childbearing age about Contraceptives In the Womb (AKDR) in the area of PMB Nita Cipancar Village Serangpanjang Subang District, most respondents had less knowledge about AKDR as much as 34 (41%).

Keywords: Knowledge, Women of Chilbearing Age, Contraceptives In The Womb
