**IMPLEMENTASI PENCEGAHAN DAN PENGENDALIAN COVID-19
DALAM PELAKSANAAN PROGRAM POSYANDU BAYI BALITA DI
PUSKESMAS TANJUNG SEKAYAM.**

ABSTRAK

Latar Belakang: Pada masa pandemi Covid-19 ini terdapat perubahan pada prosedur pelaksanaan posyandu. Namun berdasarkan hasil studi pendahuluan didapatkan pelaksanaan kegiatan posyandu di wilayah kerja Puskesmas Tanjung Sekayam, masih belum sepenuhnya mengikuti protap pelaksanaan kegiatan posyandu. Tujuan penelitian Mengetahui gambaran implementasi pencegahan dan pengendalian covid19 dalam program posyandu balita di wilayah kerja Puskesmas Tanjung Sekayam berkaitan dengan faktor komunikasi, sumber daya, disposisi, struktur birokrasi.

Metode: Penelitian ini adalah penelitian kualitatif yang bersifat deskriptif. Dengan subjek penelitian adalah bidan desa wilayah kerja Puskesmas Tanjung Sekayam. Dengan informan triangulasi adalah kepala puskesmas dan bidan penanggung jawab program posyandu bayi balita puskesmas tanjung sekayan. Informan dipilih dengan cara *total sampling*, dengan teknik pengumpulan data yaitu wawancara mendalam.

Hasil: Berdasarkan hasil dari penelitian didapatkan komunikasi yang di terapkan telah berjalan dengan efektif. Sumber daya yang dimiliki masih kurang memadai dalam mendukung pelaksanaan program. Disposisi dari kelompok target cenderung masih kurang mendukung dan terbuka terhadap pelaksanaan program. Namun struktur birokrasi berjalan dengan baik karena pelaksanaan program berjalan dengan menggunakan SOP yang telah tersedia dan disepakati.

Simpulan: Dapat disimpulkan bahwa pelaksanaan implementasi program posyandu bayi balita belum terlaksana secara baik.

Kata Kunci: Posyandu, Covid-19, Komunikasi, Sumber Daya, Disposisi, Stuktur Birokrasi

**IMPLEMENTATION OF COVID-19 PREVENTION AND CONTROL IN
THE IMPLEMENTATION OF THE POSYANDU FOR BABIES IN THE
PUSKESMAS TANJUNG SEKAYAM.**

ABSTRAK

Background: During the Covid-19 pandemic three were changes to the procedures for implementing the posyandu. However, based on the results of the preliminary study, the implementation of posyandu Activities in the working area of the Tanjung Sekayam Community Health Center was still not fully following the procedures. The purpose of the study, to know the description of the implementation of Prevention and control of covid-19 in the toddler posyandu program in the working area of the Tanjung Sekayam Public Health Center related to Communications, Resources, disposition, and bureaucratic structures.

Methods: This research is a decriptive qualitative research. With the research subject is a village midwife and the triagulation informants were the head of the Puskesmas and the midwife on charge of the posyandu program for infants at the Tanjung Sekayam Community Health Center. Informants were selected by mean of total sampling, with data collection techniques, namely in-depth interviews.

Results: Based on the results of the research, it was found that the Communications that has been implemented has been running effectively. The available Resources are still inadequate in supporting program implmentation. The disposition of the target group tends to be less supportive and open to program implementation. However, the bureaucratic structure worked well because program implementation was carried out using existng end agreed SOPs.

Conslusion: It can be concluded that the implementation of the posyandu program for infants under five has not been implemented good.
