**FAKTOR-FAKTOR YANG BERHUBUNGAN DENGAN  
PARTISIPASI IBU YANG MEMPUYAI BALITA KE POSYANDU  
DI POSYANDU MARKISA KELURAHAN LANGENSARI**

**ABSTRAK**

**Latar Belakang :** Tingkat partisipasi masyarakat dalam kegiatan posyandu minimal harus mencapai 85% jika dibawah dari itu maka dikatakan partisipasi masyarakat sangatlah rendah. Hal ini akan berakibat pada tumbuh kembang balita yang tidak akan terpantau oleh petugas kesehatan maupun kader yang ada di posyandu. Banyak faktor yang mempunyai hubungan dengan partisipasi atau kunjungan ibu balita ke posyandu seperti faktor umur ibu yang berada pada umur produktif, faktor pendidikan ibu yang lebih dominan menengah ke atas, dan faktor pekerjaan ibu yang tidak bisa ditinggalkan untuk datang ke posyandu.

**Tujuan Penelitian :** Untuk mengetahui faktor yang mempunyai hubungan dengan partisipasi ibu yang mempunyai balita ke posyandu di kelurahan Langensari.

**Metode :** Penelitian ini menggunakan desain deskriptif korelasional dengan pendekatan *cross sectional*. Populasi dalam penelitian ini adalah seluruh ibu yang mempunyai balita di Posyandu Markisa. Tehnik pengambilan sampel menggunakan *Total Sampling* sebanyak 42 responden dengan instrumen penelitian Buku Register Posyandu. Data dianalisis dengan melakukan uji analisis *chi-square*.

**Hasil :** hasil penelitian menunjukkan 54,8% responden berada pada umur dewasa awal, 76,2% responden dengan tingkat pendidikan menengah, 69,0% responden sebagai ibu rumah tangga, 52,4% responden memiliki jarak rumah yang dekat ke posyandu dan 57,1% responden yang berpartisipasi langsung ke posyandu. terdapat hubungan yang bermakna antara pendidikan ibu ( $p= 0,019$ ), pekerjaan ibu ( $p= 0,000$ ) serta tidak terdapat hubungan antara umur ibu ( $p= 0,750$ ).

**Simpulan :** Terdapat hubungan yang signifikan antara pendidikan dan pekerjaan ibu yang mempunyai balita dengan partisipasi ibu ke posyandu serta tidak terdapat hubungan yang signifikan antara umur ibu dengan partisipasi ibu ke posyandu.

**Kata Kunci :** Umur, Pendidikan, Pekerjaan, Partisipasi ibu ke posyandu

**FACTORS RELATED TO THE  
PARTICIPATION OF MOTHERS WHO HAVE TODDLERS TOGETHER TO  
POSYANDU  
AT POSYANDU MARKISA LANGENSARI KELURAHAN**

**ABSTRACT**

**Background:** The level of community participation in posyandu activities if below the minimum must reach 85% from that it can be said that community participation is very low. This will result in the growth and development of toddlers who will not be monitored by health workers or cadres at the posyandu. Many factors have a relationship with the participation or visits of mothers of children under five to the posyandu such as the age factor of the mother who is of a productive age, the education factor of the mother who is more dominant in the middle to upper class, and the work factor of the mother who cannot be left behind to come to the posyandu.

**Research Objectives:** To determine the factors that have a relationship with the participation of mothers who have toddlers to the posyandu in the Langensari village.

**Methods:** This study used a descriptive correlational design with a cross sectional approach. The population in this study were all mothers who had toddlers at Posyandu Markisa. The sampling technique used Total Sampling as many as 42 respondents with the Posyandu Register Book research instrument. Data were analyzed by performing chi-square analysis test.

**Results:** The results showed that 54.8% of respondents were in early adulthood, 76.2% of respondents with secondary education level, 69.0% of respondents as housewives, 52.4% of respondents had close proximity to posyandu and 57,1% of respondents who participate directly to the posyandu. there is a significant relationship between maternal education ( $p = 0.019$ ), mother's occupation ( $p = 0.000$ ) and there is no relationship between maternal age ( $p = 0.750$ ).

**Conclusion:** There is a significant relationship between the education and occupation of mothers who have children under five with the participation of mothers to the posyandu and there is no significant relationship between the age of the mother and the participation of mothers to the posyandu.

**Keywords:** Age, Education, Occupation, Mother's participation in posyandu
