**PENGELOLAAN GANGGUAN PERSEPSI SENSORI : HALUSINASI  
PENDENGARAN PADA PASIEN DENGAN SKIZOFRENIA DI GEDUNG  
AMARTA RSJ PROF. Dr. SOEROJO MAGELANG**

xiv + 61 halaman + 1 bagan + 2 tabel + 4 lampiran

**ABSTRAK**

Skizofrenia merupakan gangguan jiwa dengan adanya penyimpangan pada karakteristik pikiran dan persepsi serta afek yang tidak wajar maupun tumpul dan adanya gangguan kontrol emosi seperti resiko perilaku kekerasan. Tujuan penulisan Karya Tulis Ilmiah ini adalah agar penulis dapat mendiskripsikan pengelolaan gangguan persepsi sensoris : halusinasi di Gedung Amarta RSJ Prof. Dr. Soerojo Magelang.

Metode yang digunakan adalah pengelolaan dengan asuhan keperawatan. Pengelolaan halusinasi pendengaran dilakukan selama 3 hari. Pengkajian untuk pengumpulan data melalui wawancara, observasi, pemeriksaan fisik dan studi dokumentasi. Intervensi dan implementasi menggunakan strategi pelaksanaan (SP) yang terdiri dari 4 strategi pelaksanaan (SP).

Hasil pengelolaan yang didapatkan setelah diberikan strategi pelaksanaan (SP) pasien mampu melakukan SP secara mandiri yaitu mengontrol halusinasi dengan cara menghardik, minum obat, dan bercakap-cakap.

Saran bagi perawat diharapkan dapat menambah pengetahuan yang lebih dalam memberikan asuhan keperawatan pada pasien gangguan jiwa khususnya halusinasi dengan prinsip komunikasi terapeutik.

**MANAGEMENT OF SENSORY PERCEPTION DISORDERS : HEARING  
HALUSINATION IN PATIENTS WITH SCHIZOPHRENIA IN AMARTA  
BUILDING, RSJ PROF. Dr. SOEROJO MAGELANG**

xiv + 61 pages + 1 Tables+ 2 charts + 4 attachments

**ABSTRACT**

Schizophrenia is a mental disorder that affects a person's ability to think, feel, and behave properly. Sensory perception disorders: Auditory hallucinations are disturbances or changes in perception in which a person seems to hear a sound that is not actually happening. The purpose of managing sensory perception disorders: auditory hallucinations that the author did was to describe the management of auditory hallucinations sensory perception disorders in patients with schizophrenia in Kebondalem village. The method used in writing is a descriptive method. Descriptive method is a method that describes (explains) important events that occurred during the assessment.

Assessment for data collection through interviews, observations, physical examinations and documentation studies. The intervention and implementation uses an implementation strategy (SP) which consists of 4 implementation strategies (SP).

The results of the management obtained after being given the implementation strategy (SP) the patient was able to do SP independently, namely controlling hallucinations by rebuking, taking medication, and conversing.

Suggestions for nurses are expected to add deeper knowledge in providing nursing care to patients with mental disorders, especially hallucinations with the principle of therapeutic communication.
