**PENGARUH VIDEO EDUKASI DAGUSIBU OBAT TERHADAP
TINGKAT PENGETAHUAN IBU – IBU PKK DI BANJAR TENGAH
DESA SEMPIDI KECAMATAN MENGWI KABUPATEN BADUNG**

INTISARI

Latar Belakang: Efek samping yang tidak diinginkan akibat penggunaan obat di masyarakat salah satunya penggunaan obat yang salah, efek samping obat, penyimpanan obat yang salah, serta pembuangan obat yang tidak tepat. Hal ini dikarenakan adanya kesalahan pada cara mendapatkan, gunakan, simpan, buang obat tidak tepat serta dapat berdampak pada salah satunya pencemaran lingkungan. Tujuan penelitian ini adalah untuk mengetahui pengaruh video edukasi DAGUSIBU obat terhadap tingkat pengetahuan Ibu-Ibu PKK di Banjar Tengah, Desa Sempidi, Kecamatan Mengwi, Kabupaten Badung.

Metode: Metode penelitian *pre eksperimental* dengan rancangan *one group pre and post-test design*. Sampel penelitian adalah ibu-ibu PKK di Banjar Tengah, Desa Sempidi, Kecamatan Mengwi, Kabupaten Badung berusia 26-45 tahun sebanyak 100 responden. Analisa data dengan uji parametrik menggunakan uji *paired t-test*.

Hasil: Berdasarkan uji *paired t-test* nilai ($p\ value = 0,000 < 0,05$) maka adanya pengaruh video edukasi DAGUSIBU obat terhadap tingkat pengetahuan ibu-ibu PKK di Banjar Tengah, Desa Sempidi, Kecamatan Mengwi, Kabupaten Badung.

Kesimpulan: Tingkat pengetahuan responden sebelum diberikan video edukasi didapatkan hasil *pre test* dengan kategori kurang sebanyak 77%, cukup 21%, dan baik 2%. Sesudah diberikan video edukasi terdapat peningkatan terkait tingkat pengetahuan responden pada hasil *post test* meliputi kategori baik sebanyak 96% dan cukup 4%.

Kata Kunci : DAGUSIBU obat, pengetahuan, video edukasi

**THE EFFECT OF DAGUSIBU DRUG EDUCATIONAL VIDEO ON THE
LEVEL OF KNOWLEDGE OF PKK MOTHERS IN BANJAR TENGAH,
SEMPIDI VILLAGE, MENGWI DISTRICT, BADUNG REGENCY**

ABSTRACT

Background: Undesirable side effects due to the use of drugs in the community include the use of the wrong drugs, side effects of drugs, wrong storage of drugs, and improper disposal of drugs. This is because there are errors in how to get, use, store, dispose of drugs that are not appropriate and can have an impact on environmental pollution, one of which is environmental pollution. The purpose of this study was to determine the effect of the drug DAGUSIBU educational video on the level of knowledge of PKK mothers in Banjar Tengah, Sempidi Village, Mengwi District, Badung Regency.

Methods: Pre-experimental research method with one group pre and post-test design. The research sample was PKK women in Banjar Tengah, Sempidi Village, Mengwi District, Badung Regency aged 26-45 years with a total of 100 respondents. Data analysis with parametric test using a paired t - test.

Results: Based on the paired t-test value (p value = $0.000 < 0.05$), there is an effect of the drug DAGUSIBU educational video on the level of knowledge of PKK mothers in Banjar Tengah, Sempidi Village, Mengwi District, Badung Regency.

Conclusion: The level of knowledge of respondents before being given an educational video obtained pre-test results in the loss category as much as 77%, 21% enough, and 2% good. After being given an educational video, there was an increase in the level of knowledge of the respondents on the post-test results covering the good category as much as 96% and 4% enough.
