Hubungan Tingkat Pengetahuan Tentang COVID-19 Dengan Sikap Masyarakat
Dalam Mematuhi Protokol Kesehatan Di Kelurahan Wonoroto Kecamatan
Watumalang Kabupaten Wonosobo
(xviii + 144 halaman +5 tabel + 10 lampiran)

ABSTRAK

Latar Belakang : Pada Desember 2019 dunia dikejutkan dengan penemuan penyakit menular disebabkan oleh coronavirus, virus ini berasal dari Wuhan, Cina dinamakan dengan COVID-19. Protokol Kesehatan merupakan salah satu pencegahan yang dapat dilakukan masyarakat dalam meminimalisasi penyebaran. Masyarakat yang memiliki sikap positif akan memiliki perilaku mematuhi protokol kesehatan. Sikap yang diperoleh dari pengetahuan akan lebih baik dari pada tidak berasal dari pengetahuan. Pelaksanaan protokol kesehatan sudah dilaksanakan tetapi masih ada masyarakat yang mengabaikan karena kurangnya pengetahuan tentang COVID-19. Hasil wawancara 10 warga Kelurahan Wonoroto didapatkan 4 orang memiliki pengetahuan baik dan sikap positif sedangkan 6 orang memiliki pengetahuan kurang dan sikap negatif

Tujuan : Untuk mengetahui hubungan antara pengetahuan tentang COVID-19 dengan sikap masyarakat dalam mematuhi protokol kesehatan di Kelurahan Wonoroto Kabupaten Wonosobo Kecamatan Watumalang.

Metode : Penelitian ini menggunakan metode *deskriptif kualitatif* rancangan penelitian analitik dengan pendekatan *cross-sectional*. Populasi sebanyak 3772, menggunakan teknik *purposive sampling* sebanyak 97 responden. Alat pengukuran kuesioner, analisis bivariat menggunakan uji *chi-square*.

Hasil : Pengetahuan tentang COVID-19 di Kelurahan Wonoroto tergolong baik sebanyak 85,6% dan 14,4% pengetahuan cukup. Sikap positif masyarakat dalam mematuhi protokol kesehatan di Kelurahan Wonoroto sebanyak 51,5% dan 48,5% sikap negatif. Hasil uji *chi-square* P value sebesar $0.000 < \alpha (0.05)$ maka H_0 diterima artinya ada hubungan yang signifikan antara tingkat pengetahuan COVID-19 dengan sikap mematuhi protokol kesehatan.

Kesimpulan : Terdapat hubungan yang bermakna antara pengetahuan tentang COVID-19 dengan sikap masyarakat dalam mematuhi protokol kesehatan di Kelurahan Wonoroto.

Kata Kunci :Tingkat Pengetahuan Tentang COVID-19, Sikap
Mematuhi Protokol Kesehatan

The Relationship between Knowledge Levels About COVID-19 and Public Attitudes in Obeying Health Protocols in Wonoroto Village, Watumalang District, Wonosobo Regency
(xviii + 144 pages +5 tables + 10 attachments)

ABSTRACT

Background: In December 2019, the world was shocked by the discovery of an infectious disease caused by the coronavirus, this virus originated from Wuhan, China, called COVID-19. The Health Protocol is one of the precautions that the community can take to minimize the spread. People who have a positive attitude will have the behavior to comply with health protocols. The attitude obtained from knowledge will be better than not derived from knowledge. The implementation of the health protocol has been implemented but there are still people who ignore it due to lack of knowledge about COVID-19. The results of interviews with 10 residents of Wonoroto Village, it was found that 4 people had good knowledge and positive attitudes, while 6 people had less knowledge and negative attitudes

Objective: To find out the relationship between knowledge about COVID-19 and people's attitudes in complying with health protocols in Wonoroto Village, Wonosobo Regency, Watumalang District.

Methods: This study uses a descriptive qualitative analytical research design with a cross-sectional approach. The population is 3772, using purposive sampling technique as many as 97 respondents. Questionnaire measurement tool, bivariate analysis using chi-square test.

Results: Knowledge about COVID-19 in Wonoroto Village is classified as good as much as 85.6% and 14.4% knowledge is sufficient. The positive attitude of the community in complying with the health protocol in Wonoroto Village was 51.5% and 48.5% negative attitude. The results of the chi-square test P value of $0.000 < \alpha$ (0.05) then H_a is accepted, meaning that there is a significant relationship between the level of knowledge of COVID-19 and the attitude of complying with health protocols.

Conclusion: There is a significant relationship between knowledge about COVID-19 and people's attitudes in complying with health protocols in Wonoroto Village.

Keywords: Level of Knowledge About COVID-19, Attitude to Comply with Health Protocols
