## **HUBUNGAN PENGETAHUAN IBU TENTANG PERSALINANA YANG BAIK DAN AMAN DENGAN SIKAP IBU HAMIL TRIMENSTER 3 TENTANG PENOLONG PERSALINAN OLEH TENAGA KESEHATAN DI PUSKESMAS AILEU KOTA KECAMATAN AILEU KOTA KABUPATEN AILEU TAHUN 2022**

(xv+ 76 halaman + 12 tabel + 2 bagan+ 10 lampiran)

### **ABSTRAK**

**Latar Belakang :** Persalinan yang dibantu oleh tenaga kesehatan (Bidan) di Puskesmas Aileu Kecamatan Aileu kota Kabupaten Aileu sekarang kurang lebih sudah mencapai target 76%. Keberhasilan persalinan yang ditangani penolong persalinan oleh tenaga kesehatan salah satunya dipengaruhi oleh keaktifan Bidan pada kegiatan pouskesmas maupun di komunitas. Faktor yang mempengaruhi sikap positifnya ibu hamil adalah pengetahuan ibu hamil yang baik tentang peran penolong persalinan. Ternyata di Wilayah kerja Puskesmas Aileu kota ada ibu hamil yang berpengetahuan cukup dan mempunyai sikap positif pada penolong persalinan oleh tenaga kesehatan dan juga ada ibu hamil yang berpengetahuan kurang tetapi sikapnya positif terhadap penolong persalinan oleh tenaga Kesehatan.

**Tujuan :** Mengetahui Hubungan Pengetahuan Ibu Tentang Persalinan Yang Baik Dan Aman Dengan Sikap Ibu Hamil Trimester 3 Tentang Pertolongan Persalinan Oleh Tenaga Kesehatan di Puskesmas Aileu Kecamatan Aileu kota Kabupaten Aileu Tahun 2022

**Metode :** Jenis penelitian korelasi dengan pendekatan *cross sectional*. Populasi sebanyak 34 Ibu hamil dan jumlah sampel 34 responden dengan teknik *Total sampling*. Instrumen penelitian menggunakan kuesioner. Analisis data dengan melakukan uji analisis chi-square

**Hasil :** Hasil penelitian menunjukkan sebagian besar responden dalam pengetahuan ibu tentang persalinan yang baik dan aman dalam kategori cukup sebanyak 15 (44,1%) responden dan sebagian besar responden mempunyai sikap positif tentang penolong persalinan oleh tenaga kesehatan sebanyak 26 (76,5%). Didapatkan hasil uji Chi Square pada penelitian ini P Value (0,170)  $\geq \alpha(0,05)$  maka  $H_0$  gagal ditolak, artinya tidak ada hubungan antara pengetahuan ibu tentang persalianan yang baik dan aman dan sikap ibu tentang penolong persalinan oleh tenaga Kesehatan di puskesmas Aileu Kota

**Kesimpulan :** Dapat disimpulkan tidak ada hubungan antara pengetahuan ibu tentang persalianan yang baik dan aman dan sikap ibu tentang penolong persalinan oleh tenaga Kesehatan di puskesmas Aileu kota kecamatan Aileu kota kabupaten Aileu tahun 2022

**Kata kunci :** Ibu hamil, Pengetahuan, Sikap

**RELATIONSHIP OF MATERNAL KNOWLEDGE ABOUT GOOD AND SAFE DELIVERY AND ATTITUDE OF PREGNANT MOTHERS TRIMESTER 3 CONCERNING DELIVERY ASSISTANT BY HEALTH PERSONNEL AT PUSKESMAS AILEU CITY, AILEU DISTRICT, AILEU REGENCY IN 2022**

(xv+ 76 pages + 12 tables + 2 charts + 10 attachment)

**ABSTRACT**

**Background:** Deliveries assisted by health workers (midwives) at the Aileu Health Center, Aileu District, Aileu Regency, have now reached the target of 76%. The success of deliveries handled by birth attendants by health personnel is influenced by the activeness of midwives in health center activities and in the community. Factors that influence the positive attitude of pregnant women are good knowledge of pregnant women about the role of birth attendants. It turns out that in the working area of the Aileu City Health Center there are pregnant women who have sufficient knowledge and have a positive attitude towards birth attendants by health workers and there are also pregnant women who have less knowledge but have a positive attitude towards birth attendants by health workers.

**Objective :** Knowing the Relationship of Mother's Knowledge About Good And Safe Delivery With Attitudes Of Pregnant Women In Trimester 3 About Delivery Assistance By Health Workers at Aileu Health Center, Aileu District, Aileu Regency in 2022

**Methods :** This type of correlation research with a cross-sectional approach. The population is 34 pregnant women and the number of samples is 34 respondents with total sampling technique. The research instrument used a questionnaire. Data analysis by performing chi-square analysis test

**Result :** The results showed that most of the respondents in the mother's knowledge about good and safe childbirth were in the sufficient category as many as 15 (44.1%) respondents and most of the respondents had a positive attitude about childbirth assistance by health workers as many as 26 (76.5%). The results of the Chi-Square test in this study were P Value (0.170) > (0.05) then Ho failed to be rejected, meaning that there was no relationship between mother's knowledge about a good and safe birth and mother's attitude about birth attendants by health workers at the Aileu City Health Center

**Conclusion :** It can be concluded that there is no relationship between the mother's knowledge about a good and safe delivery and the mother's attitude about birth attendants by health workers at the Aileu Public Health Center, Aileu Subdistrict, Aileu Regency City in 2022.
