## **PERCEPTIONS OF WOMEN OF FERTILIZING AGE TOWARDS THE ACETIC ACID VISUAL INSPECTION PROGRAM IN GLAWAN VILLAGE, PABELAN PUSKESMAS WORKING AREA**

### **ABSTRACT**

**Background :** According to data obtained from the International Agency for Research on Cancer (IARC) in Indonesia, cervical cancer ranks second after breast cancer with a number of cases of 18,279 (10.12%) as a trigger for death in women. In an interview with one of the Midwives implementing the IVA test at the Pabelan Community Health Center , he said that the lack of public awareness was still low in the Pabelan Community Health Center area , In the working area of the Pabelan Community Health Center, specifically in Glawan Village, there are 274 couples of childbearing age with an age range of 19-25 years. Therefore the researchers were interested in taking the title "Perceptions of Women of Childbearing Age towards the Acetic Acid Visual Inspection Program at the Pabelan Community Health Center ". It is hoped that this research can become a recommendation for increasing health service programs as an intervention to improve health behavior so as to reduce morbidity and mortality from cervical cancer.

**Research Objectives :** To determine the influence of perceptions of women of childbearing age on the acetic acid visual inspection program in the Pabelan Community Health Center working area .

**Method :** In this research , researchers used a quantitative descriptive research design. The population in this study were all couples of childbearing age aged 19-45. The number of respondents in this study was 73 respondents. The sample in this study was 73 respondents using the Slovin formula , the sampling technique was random sampling, and the data collection tool used a questionnaire,

**Results :** It was found that some respondents had perceptions women of childbearing age against IVA Test examination general found as many as 38 people (52%) have perception positive and 35 people (48%) had perception negative .

**Conclusion :** Many people, especially women of childbearing age in Glawan Village, still don't know about it IVA Test examination,

**Keywords :** Perception, Women of Childbearing Age, IVA Test

**PERSEPSI WANITA USIA SUBUR TERHADAP PROGRAM INSPEKSI VISUAL ASAM ASETAT DI DESA GLAWAN WILAYAH KERJA PUSKESMAS PABELAN**

**ABSTRAK**

**Latar Belakang :** Menurut data yang didapatkan dari *International Agency for Research on Cancer* (IARC) di Indonesia kanker serviks menduduki urutan ke dua setelah kanker payudara dengan jumlah kasus 18. 279 ( 10, 12%) sebagai pemicu kematian pada wanita. Dalam wawancara terhadap salah satu Bidan pelaksana IVA test di Puskesmas Pabelan mengatakan bahwa kurangnya kesadaran masyarakat masih rendah di wilayah Puskesmas Pabelan. Pada wilayah kerja Puskesmas Pabelan tepatnya di Desa Glawan terdapat 274 pasangan usia subur dengan rentang usia 19-25 tahun. Maka dari itu peneliti tertarik mengambil judul mengenai “Persepsi Wanita Usia Subur terhadap Program Inspeksi Visual Asam Asetat di Puskesmas Pabelan”. Diharapkan penelitian ini dapat menjadi rekomendasi bagi kenaikan program pelayanan kesehatan sebagai intervensi perbaikan perilaku kesehatan sehingga menurunkan morbiditas serta mortalitas penyakit kanker serviks.

**Tujuan Penelitian :** Untuk mengetahui pengaruh persepsi wanita usia subur terhadap program inspeksi visual asam asetat di wilayah kerja Puskesmas Pabelan.

**Metode :** Dalam penelitian ini peneliti memakai desain penelitian deskriptif kuantitatif. Populasi dalam penelitian ini adalah semua Pasangan Usia Subur usia 19-45 jumlah responden dalam penelitian ini adalah 73 responden. Sampel dalam penelitian ini 73 responden dengan menggunakan rumus slovin, teknik pengambilan sampel dengan teknik random sampling, alat pengumpulan data menggunakan kuisioner.

**Hasil :** Didapatkan sebagian responden terhadap persepsi wanita usia subur terhadap Pemeriksaan IVA Test secara umum didapati sebanyak 38 orang (52%) memiliki persepsi positif dan 35 orang (48%) memiliki persepsi negatif.

**Simpulan :** Masyarakat khususnya wanita usia subur di Desa Glawan masih banyak yang belum mengetahui tentang pemeriksaan IVA Test.

**Kata Kunci :** Persepsi, Wanita Usia Subur, Pemeriksaan IVA Test
