OVERVIEW OF PREGNANT WOMEN'S KNOWLEDGE LEVEL ABOUT ANTENATAL CARE AT MIJEN HEALTH CENTER, SEMARANG

ABSTRACT

Background: Antenatal care is a service provided to pregnant women during their pregnancy period in accordance with antenatal care standards. In November 2023, a preliminary study with 15 pregnant women at Mijen Health Center found that 6 pregnant women understood the meaning, purpose, and schedule of antenatal care visits. Conversely, 9 other pregnant women were unaware of this information. This study aims to provide an overview of the level of knowledge of pregnant women about antenatal care at Mijen Health Center in Semarang Regency.

Method: The research design used in this study is quantitative descriptive. The population in this study was 66 pregnant women who visited Mijen Health Center in Semarang. The sampling was done using total sampling method.

Results: Based on the research results, the characteristics of pregnant women based on age show that almost all respondents are under 25 years old, totaling 32 people (48.5%). In terms of education, almost all respondents have completed high school, totaling 46 people (69.7%). Based on employment status, almost all respondents are unemployed, totaling 37 people (56.1%). The knowledge of postpartum mothers shows that almost all respondents have sufficient knowledge, with 18 respondents (60%). Knowledge of pregnant women about the definition of antenatal care is good for almost all respondents, totaling 52 people (78.8%). Knowledge about the purpose of antenatal care is sufficient for almost all respondents, totaling 36 people (54.5%). Knowledge about antenatal care visits is sufficient for almost all respondents, totaling 29 people (43.9%).

Conclusion: Respondents' knowledge about the definition of antenatal care is good, the understanding of the purpose of antenatal care is sufficient, and the awareness of the schedule for antenatal care visits is adequate. It is hoped that pregnant women, especially those at Mijen Health Center in Semarang, can understand the importance of knowing about antenatal care examinations during pregnancy.
