**Hubungan Tingkat Pengetahuan dan Sikap dengan Minat IUD di TPMB Catur
Widayanti,S.SI.T,BDN Balikpapan**

ABSTRAK

Latar Belakang : angka kelahiran yang tinggi dapat dicegah melalui program KB, berbagai macam alat kontrasepsi dapat digunakan, salah satu alat kontrasepsi yang memiliki efektifitas tinggi, mudah dan murah adalah IUD, tetapi minat ibu menggunakan IUD masih rendah, hal ini dapat disebabkan karena pengetahuan yang kurang dan sikap negative terhadap IUD.

Tujuan Penelitian : Mengetahui hubungan tingkat pengetahuan dan sikap dengan minat IUD di TPMB Catur Widayanti, S.SI.T, Bdn Balikpapan.

Metode : Desain penelitian ini adalah penelitian deskriptif korelasi dengan pendekatan *cross sectional*. Populasi dalam penelitian ini adalah seluruh akseptor KB di TPMB Catur Widayanti, S.SI.T, Bdn Balikpapan sampai periode bulan November 2023 sebanyak 132 orang. Teknik pengambilan sampel menggunakan *purposive sampling*, sampel sejumlah 57 orang, alat pengumpulan data menggunakan kuesioner, teknik analisa data bivariat menggunakan uji *Chi Square*.

Hasil : Berdasarkan hasil penelitian, didapatkan pengetahuan tentang IUD di TPMB Catur Widayanti, S.SI.T, Bdn Balikpapan sebagian besar cukup, sikap tentang IUD sebagian besar negative dan minat IUD sebagian besar rendah. Ada hubungan pengetahuan dan sikap dengan minat IUD di TPMB Catur Widayanti, S.SI.T, Bdn Balikpapan dengan nilai p value 0,000.

Kesimpulan : semakin tinggi tingkat pengetahuan ibu tentang IUD maka semakin tinggi minat menggunakan IUD, semakin positif sikap terhadap IUD maka semakin tinggi minat menggunakan IUD.

***Relationship between level of knowledge and attitude with interest in IUD at TPMB Catur
Widayanti, S.SI.T, BDN Balikpapan***

ABSTRACT

Background: high birth rates can be prevented through family planning programs, various types of contraceptives can be used, one contraceptive device that is highly effective, easy and cheap is the IUD, but mothers' interest in using the IUD is still low, this can be caused by insufficient knowledge lack of and negative attitudes towards IUDs.

Research Objective: To determine the relationship between the level of knowledge and attitudes and interest in IUD at TPMB Catur Widayanti, S.SI.T, Bdn Balikpapan.

Method: The design of this research is descriptive correlation research with a cross sectional approach. The population in this study were all family planning acceptors at TPMB Catur Widayanti, S.SI.T, Bdn Balikpapan until the period of November 2023, totaling 132 people. The sampling technique used purposive sampling, a sample of 57 people, the data collection tool used a questionnaire, the bivariate data analysis technique used the Chi Square test.

Results: Based on the research results, it was found that knowledge about IUD at TPMB Catur Widayanti, S.SI.T, Bdn Balikpapan was mostly sufficient, attitudes about IUDs were mostly negative and interest in IUD was mostly low. There is a relationship between knowledge and attitude and interest in IUD at TPMB Catur Widayanti, S.SI.T, Bdn Balikpapan with a p value of 0.000.

Conclusion: the higher the mother's level of knowledge about IUD, the higher the interest in using IUDs, the more positive the attitude towards IUDs, the higher interest in using IUD.
