## **OPTIMALISASI PELAPORAN SURVEILANS INTEGRASI PD3I DALAM UPAYA PENEMUAN KASUS PD3I DAN PENCEGAHAN, PENGENDALIAN PENYAKIT POTENSIAL KLB DI RSUD LAMANDAU**

### **Abstrak**

Dinas Kesehatan Kab. Lamandau melakukan upaya pencegahan dan pengendalian penyakit secara dini dengan meningkatkan kinerja surveilans dan respons dini di setiap faskes yang dimiliki. RSUD menyediakan berbagai layanan medis, seperti rawat jalan, rawat inap, pelayanan gawat darurat, dan pelayanan penunjang medis untuk membantu pasien dalam proses penyembuhan. Sehingga proses proses Pelaporan surveilans integrasi PD3I dalam upaya penemuan kasus PD3I dan pencegahan, pengendalian penyakit potensial KLB di RSUD Lamandau belum berjalan maksimal.

**Tujuan:** Memberikan gambaran proses optimalisasi pelaporan surveilans integrasi PD3I dalam upaya penemuan kasus PD3I dan pencegahan, pengendalian penyakit potensial KLB.

**Metode:** Inovasi karya kinerja ini dilakukan dengan membuat grup Whatsapp sebagai media pelaporan Surveilans Integrasi PD3I

**Hasil:** Inovasi karya kinerja ini telah berhasil memberikan kontribusi yang signifikan terhadap peningkatan kualitas pelayanan keperawatan, khususnya dalam aspek pelaporan, pencegahan dan pengendalian penyakit potensial KLB.

**Saran:** disarankan agar penerapan metode pelaporan melalui aplikasi Whatsap ini dilakukan secara konsisten. Hal ini memerlukan dukungan manajemen Rumah Sakit, terutama dalam sosialisasi, tata aturan yang jelas, dan didukung dengan pelatihan untuk tenaga kesehatan.

**Kata Kunci:** Pelaporan Surveilans Integrasi PD3I, Whatsapp Grup.

*OPTIMIZING INTEGRATED SURVEILLANCE REPORTING OF PD3I IN EFFORT TO FIND  
PD3I CASES AND PREVENT AND CONTROL POTENTIAL DISEASES IN LAMANDAU  
REGIONAL HOSPITAL*

***Abstract***

*The Lamandau Regency Health Office is implementing early disease prevention and control efforts by improving surveillance and early response performance at each health facility. The hospital provides various medical services, such as outpatient care, inpatient care, emergency services, and medical support services to assist patients in their recovery. Consequently, the integrated PD3I surveillance reporting process for PD3I case detection and prevention and control of potential diseases in Lamandau Regional Hospital has not been optimal.*

***Objective:*** *To provide an overview of the process of optimizing integrated PD3I surveillance reporting for PD3I case detection and prevention and control of potential diseases in Lamandau Regional Hospital.*

***Methods:*** *This performance innovation was implemented by creating a WhatsApp group as a medium for reporting PD3I Integrated Surveillance.*

***Results:*** *This performance innovation has significantly contributed to improving the quality of nursing services, particularly in the reporting, prevention, and control of potential outbreaks.*

***Recommendation:*** *It is recommended that the WhatsApp reporting method be implemented consistently. This requires support from hospital management, particularly in terms of outreach, clear regulations, and training for healthcare workers.*

***Keywords:*** *PD3I Integrated Surveillance Reporting, WhatsApp Group.*
